🎯 Objective

Frontend Developer and DevOps enthusiast with experience building responsive web applications, interactive user interfaces, and cloud-based solutions using HTML, CSS, JavaScript, React, Docker, AWS, and GitHub Actions. Passionate about solving real-world problems through technology and collaborating in fast-paced environments while studying Chemistry at the University of Lagos.

🎓 Education

University of Lagos (UNILAG) – Lagos, Nigeria
B.Sc. Chemistry (in view)
Expected Graduation: 2028

📁 Technical Skills

- Languages & Tools: HTML, CSS, JavaScript, Git, GitHub, Docker, AWS
- Frameworks: React.js
- Other: Responsive Design, DOM Manipulation, CI/CD Pipelines, Debugging, REST APIs
- Soft Skills: Team Collaboration, Self-Motivation, Fast Learner, Problem Solving, Communication
- Other Creative Skills: Graphic Design (Adobe Photoshop, Canva)

🚀 Projects

Tech Goals Tracker – Live Site: <https://jamiu-tech-goals.netlify.app> | **GitHub:** <https://github.com/Confidenceb/HNG-Stage-1-Project>

- Built an interactive web app that helps developers track and manage tech learning goals.
- Implemented real-time DOM updates for adding and completing goals.
- Designed a clean and responsive user experience.

Prisus AI – Live Site: <https://prisus.vercel.app> | **GitHub:** <https://github.com/Confidenceb/Prisus>

- Built an AI-powered study assistant that converts notes into flashcards and quizzes.
- Developed the frontend using React for seamless interaction.
- Integrated AI-powered content generation workflows.

Hunger Heatmap – Live Site: <https://hungerheatmap.vercel.app/> | **GitHub:** <https://github.com/Confidenceb/Hunger-Heatmap>

- Built a crowdsourced platform to visualize hunger hotspots.
- Structured user-generated reports into geographic insights.
- Focused on accessibility and usability for all users.

Lost and Found App – Live Site: <https://lost-and-found-app-iota.vercel.app/> | GitHub: <https://github.com/Confidenceb/lost-and-found-app>

- Developed a platform for reporting and recovering lost items.
- Designed intuitive listing cards with item details and contact information.
- Prioritized fast navigation and user-friendly design.

StudyMart – Techstars Hackathon 🏆 – Live Site: <https://techstars-hackathon-25.vercel.app/> | GitHub: <https://github.com/Confidenceb/Techstars-Hackathon-25>

- Led a cross-functional team during the Techstars UNILAG Hackathon.
- Coordinated ideation, product design, and MVP development within 48 hours.
- Secured 2nd place at the hackathon competition.

Serverless Contact Form (AWS) | GitHub: <https://github.com/Confidenceb/TechCrush-CapstoneProject-AWS-Serverless-ContactForm>

- Built a fully serverless contact form using AWS services.
- Implemented scalable form handling without managing backend servers.
- Ensured secure and reliable request processing.

Dockerized Node App | GitHub: <https://github.com/Confidenceb/dockerized-node-app>

- Containerized a Node.js application using Docker.
- Configured environment variables and optimized deployment workflows.
- Ensured consistent deployment across environments.

CI/CD Pipeline with GitHub Actions | GitHub: <https://github.com/Confidenceb/hng13-stage1-devops>

- Automated testing, linting, and deployment workflows using GitHub Actions.
- Improved development efficiency and reduced deployment errors.
- Integrated reliable build validation processes.

Certification & Achievements

Team Lead – Techstars Hackathon (2025)

- Led a team to build an innovative marketplace solution (StudyMart) within 48 hours, securing 2nd place.

Team Lead – Interschool Hackathon, Odi Olowo-Ojuwoye LGA (2025)

- Represented school and coordinated a team to develop a tech project that solved a local community challenge.

Extracurricular Activities

- Innovation Club Member
- Represented school in the 'Rise for the World' global challenge with tech-driven ideas.
